

AMR GROUP COMPANY
FOR GENERAL TRADING W.L.L

COMPANY PROFILE

2022

Introduction

AMR GROUP is a company that is involved in diverse activities under the engineering chairmanship Amr Abdulhaleem. This company has been established in 2018 by the team of qualified Engineers who are specialized in Electrical, Mechanical, Civil and Architectures.

Under the wise leadership and guidance of Amr Abdulhaleem, the group is flourished and is now spreading its department to various sectors of the industry. As mentioned above, the members of the group are doing various activities.

We are focusing on attending almost all sectors of the industry. This includes the petroleum, agriculture and construction industry.

This group is also under the direct management of our chairman whose role is to coordinate and direct the activities of the members and promote them with the vision and commitment to the state and society. Presently, we are involved in trading, investment and development, and many other fields. In addition, we are aiming to expand our services and scope to other departments with the unique products and services that can soon be introduced to this link. Meanwhile, we are gladly looking forward to doing business with you.

Our Mission

Our Mission is to become a leading provider of Integrated Operations & Maintenance Services to the Oil & Gas s. and Industrial Sectors, while upholding the highest HSE and Quality Standard

Reliability

AMR GROUP is a trustworthy and dependable company that can lead you through the journey to success. We uphold our integrity and our partner's confidence in our product, quality and service. Which can help in process of building a better future.

Our ideal

As a responsible company, we uphold our ideals in very aspects we are involved in for the benefit of our customers, investors, employees, nation and partners.

GAS & OIL

AMR GROUP and partners provide integrated, cost-effective and sustainable oil and gas solutions. Our goal is always to build and sustain great customer relationships by creating long-term value for their organizations. , Our cooperation with our various strategic partners, we have over 5 years of experience in developing world scale industrial and energy projects. We make it our personal business to make sure that your business runs smoothly. Today's market demands mean that our customers continuously look to improve their business efficiency. Amr group create tailor-made service solutions that are designed to help you meet your goal by delivering comprehensive, business-result enhancing and long-term solutions

SERVICES PROVIDED

Exploration and Production:

AMR GROUP, and partners, is an oil and natural gas exploration and production company. Our operations are focused on the onshore and offshore of the Asia Pacific and Middle East Regions.

AMR GROUP's portfolio of oil and gas properties provides stable and environmentally responsible production, and a platform for future growth.

Our primary goal is to build value by:

- Exploring undiscovered and under exploited oil and natural gas reserves;
- Purchasing and developing oil and natural gas properties;
- Enhancing the value of production through marketing and midstream activities;

Optimizing production operations to control costs.

Our exploration wing, and partners, primarily focused on the acquisition, exploration and development of oil and natural gas properties. We continue to pursue other exploration and development projects and acquisition of opportunities internationally.

Our technical and operational personnel have substantial experience in the oil and natural gas industry across a broad range of disciplines.

AMR GROUP has grown by acquiring undervalued and under-exploited fields and rehabilitating the properties into high quality producing assets. One of our primary objectives is to apply our engineering expertise to newly acquired fields to improve recovery rates, and as a result, substantially increase the production rates and reserve volumes. We are always improving our technology to increase our productivity and we strive to continuously push the envelope.

Drilling:

AMR GROUP and partners are capable of providing both offshore and onshore oil and gas drilling rigs with the widest drilling angles available in the market.

Our priority is to meet our local and international customers' needs in a timely fashion which is made possible by our well trained professionals and advanced technologies. These technologies have evolved during the course of our works that are carried out in both surface and underground drilling. This has enabled us to deliver top quality samples to our customers even in extreme conditions.

We offer a wide range of land rigs for onshore operations and jack up rigs for shallow and deep sea drilling operations that are occupationally safe and time efficient.

Some of the salient features of the drilling services we offer are:

- Cost efficient.
- Time efficient.
- Environment friendly.
- State of the art technology.
- Occupational safety.

Trained and highly experienced professionals.

Amr Group is committed to continuous development, and is always in the lookout for improving technologies and personnel to always deliver top notch services to our customers.

Custom Rig Construction:

Rig Construction & Retrofit

AMR GROUP, and partners, design, build and supply geotechnical, marine drill rigs, artic rigs, desert rigs, special rigs and provide technical and professional support to companies in the oil and gas, offshore or geotechnical services industries worldwide. We focused on both building new rigs and retrofitting existing rigs to meet the specific requirements of discerning customers.

Amr group has the capability to design, fabricate or rebuild a drilling rig as well as the engineering capability to design a complete rig layout package. AMR GROUP refurbishes rigs to the customers' specifications ranging from minor repairs to a complete rebuild.

We build and refurbish:

- Service Rigs
- Work over Rigs
- Drilling Rigs

AMR GROUP has a professional team comprising of industry veterans experienced in “hands-on” situations found in sampling and coring in the offshore, and have the technical expertise capable of designing and building reliable and user-friendly rigs for a wide range of application systems. Furthermore, Dar AL Arab Rig Builders are supported by reputable suppliers of mission critical components and drill fabrication facilities operating to international standards.

Complete Rig Layout Packages can include such items as:

- Mobile drilling rig
- Doghouse
- Work shop
- Accumulator room
- Generator room
- Crew change room
- Fuel Tank

Pipeline Construction:

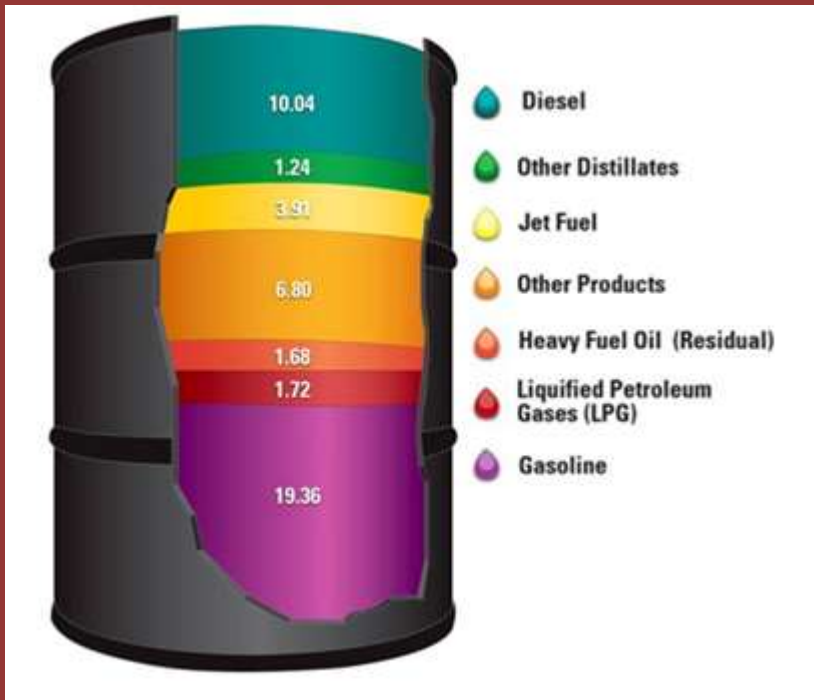

At AMR GROUP, we, with our partners, offer a distinctive set of pipeline services unmatched in the oil & gas industry.

Some of the services we render include pipeline construction, sub-contractor management and labor resource management.

Our experiences in the construction of pipelines including mainline cross country construction have been our strength to take on new projects. Such projects have utilized mechanized and manual welding methods in a large mixture of geographic terrains. Amr Group’s current capacity includes two mainline spreads of modern pipeline construction equipment. We can also provide quality construction service both for underground and above the ground piping for oil and gas transfer.

GAS & OIL PRODUCTS

AMR GROUP is a trader of energy products and do everything possible to ensure their trade works better by developing a diverse, global customer base along with an extensive network with long term relationships. By doing this we can offer a full range of services tailored to meet the needs of every client.

Our aim is to build sustained shared value while earning the trust of those works among us and other participants in the energy markets.

OUR PRODUCTS:

- CRUDE OIL
- DIESEL GAS D2 OIL GOST 305-82
- LIST OF PRODUCTS DIESEL EN590 (10PPM)
- DIESEL FUEL EN-590 ULSD 10PPM/50PMM/500PMM GASOLINE
- FUEL OIL CST-180
- AUTOMOTIVE GAS OIL – AGO OIL (AGO)
- MAZUT M-100 GOST 10585-75/9
- JETFUEL JP54 (AVIATION KEROSENE)
- JET FUEL JPA1 (AVIATION KEROSENE COLONIAL GRADE A1)
- UREA 46% PRILLED & GRANULAR
- D6 VIRGIN FUEL OIL
- LIQUEFIED NATURAL GAS (LNG)
- LIQUEFIED PETROLEUM GAS (LPG)
- REBCO GOST 9965-76
- BASE OIL/SN 500
- BASE OIL/SN 150
- BASE OIL/SN 190
- BITUMEN

CONSTRUCTION MATERIALS

One major area of wholesale distribution is the Construction Materials Industry. The construction materials industry includes suppliers of the raw materials used by construction firms when building commercial and residential properties. This means that basic materials such as aluminum composite panel, ISO foam pin, concrete and cement in addition to wood, lumber, wood paneling and mill work products fall into this category. Additionally, distributors also supply roofing, guttering and insulation products.

There is a secondary market with associated products for the sector such as glass work wire and fencing are also supplied. With such a wide variety of products within the construction materials industry, it becomes very important for wholesale distributors to exercise good stock control to maintain profitability. The construction and building materials industry is often difficult to track because it is wholly dependent on the trends of the building industry.

Fortunately, a rise in urbanization and expanding industry coupled with a growing population and economic growth has seen the sector grow considerably. It is predicted that the global industry in construction supplies will reach US \$1.1 trillion by 2020 (Source).

We are exclusive agent of TECHNOPANEL in Kuwait

PRODUCTS

A2 (FR-PE) Fireproof

A highly efficient product that has the ability to stop the spread of flame and reduce the emission of smoke, it acts as an insulating barrier for heat transfer and penetration, as it decomposes into particles in the event of high temperatures and stops the spread of flame

B1 (FR-PE) Fireproof

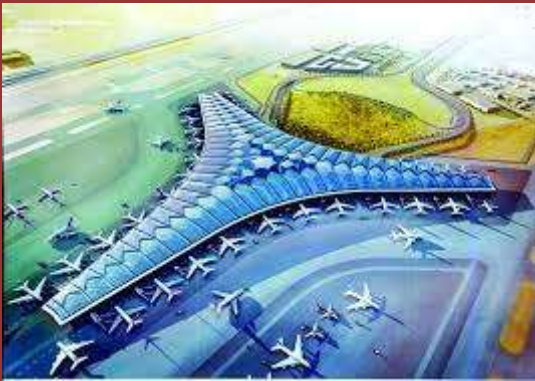

A high performance product consisting of two sheets of excluded aluminum insulated with a layer of low-density plastic halogen-free and suitable for use in cladding the outer and inner walls of buildings under renovation which are designed to reduce the risk of structural fire and have the ability to limit the spread of intense flame for a specified period and reduce

smoke And delay the transfer of heat through it.

(LDPE) Not Fireproof

Low-density plastic thermally manufactured from petroleum that does not have a reaction at normal temperatures except by a strong oxidizing agent, as it withstands temperatures up to 80 degrees Celsius continuously and to 95 degrees Celsius for a short period manufactured in a transparent or opaque shape. Differences are to a large extent very flexible Stiff but breakable.

OUR PROJECT

New Kuwait Airport

Jaber Al Ahmed Fire Station

The only approved material in

We are exclusive agent of ARABIAN MASA PANEL in Kuwait

Aluminum Composite Panel is a revolutionary and versatile new decorative building material widely used in interior and exteriors of buildings as curtain walls, paneling and cladding applications. It offers innovative, modern, beautiful, creative and practical design possibilities for a variety of applications including panel for modern high rise buildings satisfying every need of architects, engineers, contractors and building owners.

Masa is determining one of the leading coil coating and Aluminum Composite Panel producers in KSA. The high advanced factory is located in Jeddah, Saudi Arabia. The factory has annual production of capability of over 3000 ton per shift of coil coating and over of Aluminum composite panel.

Why we chose ARABIAN MASA PANEL?

Masa industries enjoy the availability and acquisition of in house engineering expertise to handle and product within our scope of production. The availability of modern coating lines and composite lines to produce ordinary or FR panels, usage of best raw materials specifications from best international firms are surely considered to be a unique added value to meet and satisfy our clients demands in very short time which in turn makes MASA to be a leader in this industry.

Products:

ACP - PE

Aluminum composite panel is consists of two sheets of aluminum, sandwiching with a solid core of extruded thermoplastic (LDPE).Core material formed in a continuous co-extrusion process with no glues or adhesives between dissimilar materials. These types of panels are used in less fire risk areas. Exterior of panel is Aluminum Sheet Coated with PVDF/Lumiflon and rear side is available as Mill Finish / Polyester Service Coat / Chromate. The panels are available in standard as well as customized sizes, colors and finishes.

ACP - FR

Aluminum Composite Panels with Fire-Retardant Mineral Core and Color Coated Aluminum on either sides; manufactured through continuous co-extrusion process. ACP (FR) is available in various Colors, Finishes, and Sizes.

Our Projects

We are Exclusive supplier of ALFA Fuel Station

Our project with Alfa station:

- Jahra - Road 80ty 2018
- Salwa 2018
- Mansoriya 2019

National Guard Society 2018

Kuwait Airport - Jazeera Airways Terminal 2018

Kuwait Municipality 2018

AGRICULTURE

Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The study of agriculture is known as agricultural science. The history of agriculture dates back thousands of years; people gathered wild grains at least 105,000 years ago and began to plant them around 11,500 years ago before they became domesticated. Sheep and cattle were domesticated over 10,000 years ago. Crops originate from at least 11 regions of the world. Industrial agriculture based on large-scale monoculture has in the past century come to dominate agricultural output, though about 2 billion people worldwide still depend on subsistence agriculture

Modern agronomy, plant breeding, agrochemicals such as pesticides and fertilizers, and technological developments have sharply increased yields from cultivation, but at the same time have caused widespread ecological and environmental damage. Selective breeding and modern practices in animal husbandry have similarly increased the output of meat, but have raised concerns about animal welfare and environmental damage through contributions to global warming, depletion of aquifers, deforestation, antibiotic resistance, and growth hormones in industrially produced meat. Genetically modified organisms are widely used, although they are banned in several countries.

The major agricultural products can be broadly grouped into foods, fibers, fuels, and raw materials (such as rubber). Classes of foods include cereals (grains), vegetables, fruits, oils, meat, milk, fungi and eggs. Over one-third of the world's workers are employed in agriculture, second only to the service sector, although the number of agricultural workers in developed countries has decreased significantly over the past several centuries.

Crops:

- Barley
- Soft Milling Wheat
- Sunflower
- Corn
- Rice
- Sugar
- Soya

Food Products

- Sunflower oil
- Corn oil
- Vegetables
- Fruits
- Tomato paste

Poultry

- Frozen Chicken
- Egg
- Parts of Chicken

Frozen meet

Shrimp

Fish

Forage & Animal feeds products: ALFALFA

We have a range of animal feed Products which play very important role in protecting and maintaining animal health.
